◦ SKILLS ◦

React, TypeScript, JavaScript
Node.js, Express, REST APIs
MongoDB, MySQL
JWT Auth, RBAC
Git, GitHub, Postman
OpenAI API

◦ LANGUAGES ◦

English

PROFILE

Full-stack developer specializing in React and Node.js, delivering maintainable web applications end-to-end. Strong experience in REST API design, authentication/authorization (JWT, RBAC), and data modeling with MongoDB and MySQL. Focused on clean code, clear interfaces, input validation, and pragmatic engineering decisions that keep systems reliable and easy to evolve.

Comfortable owning features from requirements to production and collaborating with technical and non-technical stakeholders.

EMPLOYMENT HISTORY

Full-Stack Developer (Freelance / Project-based) — SIGECON (Contracts & Work Orders)

Sept 2025 — Dec 2025

- Delivered a web system replacing spreadsheet workflows for contracts and work orders (React, Node.js, MongoDB/MySQL).
- Automated contract ingestion (upload, field extraction, validation, persistence), reducing manual entry.
- Implemented work-order generation with business rules and standardized Excel export templates.
- Built dashboards and operational reports (PDF/Excel) with authentication, RBAC, and input validation.

Full-Stack Developer (Freelance / Project-based) — Nursia (Healthcare Platform)

Sept 2025 — Nov 2025

- Built an end-to-end platform to digitize and manage nursing/health records (React, Node.js, MongoDB).
- Implemented document upload and AI-assisted data extraction to structure scanned/handwritten forms.
- Developed authentication and RBAC to separate admin and staff permissions.
- Added reporting/exports to support day-to-day operations (summaries, lists, CSV/Excel as needed).

Programming Instructor — IEMA (State Institute), Coelho Neto, Maranhão

May 2024 — Present

- Taught programming fundamentals in C, Python, and JavaScript (problem-solving, data structures, debugging).
- Mentored projects from requirements to delivery, including web interfaces (HTML/CSS/JS) and Python automation scripts.
- Guided software + robotics kit integration, reinforcing modular design and reliability practices.

EDUCATION

Computer Technician, IFMA

Jan 2016 — Dec 2018

Bachelor's in Computer Science, IFMA

Jan 2019 — Dec 2022
